1956 - 1957 GLADIOLUS OFFERINGS

We take pleasure in presenting our 1956-1957 catalog for your approval and consideration in which is listed nearly 80 varieties of Gladiolus covering a wide range of color and sizes. Prices in various quantities to best fit your needs.

Glad's are quite easily grown and are not exacting as to soil. For best results we suggest they be planted in rows of 18 to 24 inches apart with about three large bulbs or five or six medium bulbs per lineal foot. Of most importance is to get good varieties and young vigorous bulbs.

CLASSIFICATION OF VARIETIES

We again reprint North America Gladiolus Council classification breakdown for the benefit of our customers that may wish to select varieties according to classification number for exhibition in Glad Show. Each year more of the local, county and other flower shows are using N.A.G.C. classification to set up competitive Gladiolus classes.

ALL-AMERICAN GLADIOLUS SELECTIONS

In an effort to better serve their customers our North America Gladiolus Grower Association has established the organization Select Glads Inc. Select Glads Inc. has thirty directors operating thirty test gardens reaching from British Columbia to Florida, and Ontario to California. Hundreds of Hybridizers pet seedlings are grown in each and all test gardens under a number so the director doesn't know whose pet it is. Performance ratings are given each seedling by each director as he observes it in his test garden. Seedling ratings from all the test gardens with widely varying climate and soils are compiled by Executive Secretary of Select Glads Inc. prior to the annual meeting of the directors. Directors then study the composite rating and select the All-American winners if any are deemed worthy. After all voting is completed and awards granted for All-America Gladiolus Selections (AAGS) the directors are then informed by the Executive Secretary whose pet seedling or seedlings they have given this high honor. All-America Gladiolus Selection being made similar to All-America Rose Selection, should give the home gardener help in selecting new Glads in the future comparable to the guidance gained and enjoyed by years of All-America Rose Selection's.

Apple Blossom & Royal Stewart the 1956 A.A.G.S. winners received considerable favorable praise and are being offered along with Caribbean and Maytime the new A.A.G.S. selections for 1957. Large Bulbs only.

APPLE BLOSSOM 460 (Baerman-Fisher A.A.G.S. '56) (Pat)

A gladiolus of the utmost delicacy of coloring, the predominating hue being snowy white with a faint touch of cream in the throat and an exquisite flush of corona or cool rose pink at the edges of the petals. Up to eight or ten trimly tailored florets, about five inches in diameter and of a very heavy substance, are open at a time on spikes up to five feet tall.

ROYAL STEWART 450 (Pommert A.A.G.S. '56) (Pat)

A truly remarkable new gladiolus variety that has been widely acclaimed for its consistently fine performances. The lightly ruffled florets are five inches in diameter and are of good substance. They are a clear light red and the long flowerheads frequently carry up to twelve flowers open at one time.

CARIBBEAN 376 (Baerman-Fisher A.A.G.S. '57) (Pat)

The delicate blue tones of this exciting novelty present an unusual combination of rare blue-violet petals handsomely embellished by a rich, deep violet throat and a small cream spear. CARIBBEAN opens from 9 to 11 precisely styled florets at one time in formal, double-row placement. It possesses a quality uncommon to many varieties and almost a rarity among "so-called blue glads", that of extreme vigor. In every way, CARIBBEAN displays top performance. It consistently produces tall, well-proportioned spikes and unusually healthy bulbs. It is the first distinctly ruffled blue-violet gladiolus. Every flower lover will want this striking novelty in his garden. Its refreshing beauty will make it a sure-fire winner in its class at flower shows.

MAYTIME 442 (Baerman-Fisher A.A.G.S. '57) (Pat)

A light-hearted charm surrounds this brightly colored glad. The gracefully ruffled deep, pure pink florets with their contrasty large white throats bring back the memory of the freshness of May-blooming flowers. MAYTIME is a lithesome glad of good height. It readily opens 8 to 10 florets on spikes of five and one-half feet tall. A robust grower, MAYTIME has wonderful plant health and makes fine, plump bulbs. You will love Maytime for its long ribbon of color, for the silky taffeta sheen of its petals, and for its remarkable ease of growth. An ideal flower for either cutting or exhibition and a gem for the home garden.

Priced (all four varieties) 50c each 6 for \$2.50, 12 for \$5.00 on one variety or a combination of varieties.

EXTRA BONUS BULB

A couple years ago we offered two seedlings as bonus bulbs for our customers to try and comment on. While considerable favorable comment was received we also received enough criticism to discourage naming and introducing those selections.

Now we offer our seedling 51-15; which to us at least shows considerable more promise, as extra bonus of one bulb on orders of \$5.00 or more. We again will appreciate your comment.

51-15: A heavy textured ruffled deep coral with small yellow throat set off by a carmen feather. Grows to medium height having well balanced flowerhead with good placement. The 4½-5½ inch florets have a lot of sparkle.
